

Hello, world!

Latihan Project Hello World

1. Ganti baris tersebut menjadi @RequestMapping("/hello123")

```
C:\Users\Nabilah Zhafira V\eclipse-workspace\tutorial2\src\main\res...
                                                                                                                                                                                                                                                                                                                                               hello.html

☑ PageController.java 
☒
          package com.example.demo.controller;
           3 import org.springframework.stereotype.Controller;
          4 import org.springframework.web.bind.annotation.RequestMapping;
                        public class PageController
          6 @Controller
          7
          8
          90
                                                @RequestMapping("/hello123")
      10
                                               public String index ()
      11
      12
                                                                      return "hello";
      13
  14 }
              Tidak terdapat compile error.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              - 0

```

← → C (i) localhost/(000/helio

This application has no explicit mapping for lerror, so you are seeing this as a fallback.

Wed Sep 13 20:32:01 ICT 2017 There was an unexpected error (type=Not Found, status=404). No message available

2. Ganti nama method index() dengan nama method hello()

```
C:\Users\Nabilah Zhafira V\eclipse-workspace\tutorial2\src\main\res...
                                                          hello.html
                                                                         package com.example.demo.controller;
 3@ import org.springframework.stereotype.Controller;
 4 import org.springframework.web.bind.annotation.RequestMapping;
 6 @Controller
 7 public class PageController
 8 {
        @RequestMapping("/hello")
 9⊜
10
        public String hello()
11
 12
            return "hello";
13
14 }
```

Pertanyaan:

Apakah compile error?

→ Tidak terdapat compile error.

Hello, world!

3. Ganti string return type menjadi return "hello123";

```
C:\Users\Nabilah Zhafira V\eclipse-workspace\tutorial2\src\main\res...
                                                          hello.html
                                                                        package com.example.demo.controller;
 3 import org.springframework.stereotype.Controller;
 4 import org.springframework.web.bind.annotation.RequestMapping;
 6 @Controller
 7 public class PageController
 8 {
9⊝
        @RequestMapping("/hello")
10
        public String index()
11
            return "hello123";
12
13
        }
14 }
```

Pertanyaan:

Apakah compile error?

→ Tidak terdapat compile error.

Pertanyaan:

Menandakan apakah String yang di-return tersebut?

→ Return menandakan request mapping yang sedang dibuka.

Latihan Request Parameter

 Ubah nilai anotasi RequestMapping dari "/greeting" menjadi "/hello/greeting" Buka localhost: 8080/hello/greeting?name=chanek

```
C:\Users\Nabilah ...
                      hello.html

    PageController.ja... 
    □ C:\Users\Nabilah ...

                                                                                  greeting.html
  package com.example.demo.controller;
  3 import org.springframework.stereotype.Controller;
  4 import org.springframework.ui.Model;
  5 | import org.springframework.web.bind.annotation.RequestMapping;
  6 import org.springframework.web.bind.annotation.RequestParam;
 8 @Controller
 9 public class PageController
10 {
110
         @RequestMapping("/hello")
 12
        public String index()
 13
         {
             return "hello";
 14
 15
         }
 16
        @RequestMapping("/hello/greeting")
 17⊜
 18
         public String greeting (@RequestParam(value = "name") String name, Model model)
 19
 20
             model.addAttribute ("name", name);
 21
             return "greeting";
22
        }
 23 }
```

Buka localhost: 8080/hello/greeting?name=chanek

Pertanyaan: apakah hasilnya?

Whitelabel Error Page

This application has no explicit mapping for /error, so you are seeing this as a fallback.

Wed Sep 13 21:56:46 ICT 2017

There was an unexpected error (type=Not Found, status=404).

No message available

2. Akses localhost: 8080/greeting

Ubah header method greeting menjadi seperti berikut

```
@RequestMapping("/greeting")
public String greeting (@RequestParam(value = "name", required = false) String name, Model model)
```

Stop Spring Boot yang sedang berjalan, run kembali, buka localhost: 8080/greeting Pertanyaan: Apakah hasilnya?

3. Ubah header method greeting menjadi seperti berikut

```
@RequestMapping("/greeting")
public String greeting (@RequestParam(value = "name", required = false, defaultValue = "dunia") String name, Model model)
{
```

Stop Spring Boot yang sedang berjalan, run kembali, dan buka localhost: 8080/greeting.

Pertanyaan: apakah hasilnya?

4. Perhatikan bahwa pada berkas greeting.html, tag paragraf yang kita tambahkan adalah sebagai berikut:

```
 Sapaan untuk user
```

Pertanyaan: Mengapa tulisan "Sapaan untuk user" tidak pernah muncul?

→ Karena "th:text" meng-overwrite tulisan tersebut.

Latihan Path Variable:

1. Akses localhost:8080/greeting/

Pertanyaan: Apa hasilnya?

Ubah method greetingPath menjadi seperti berikut

```
@RequestMapping("/greeting/{name}")
public String greetingPath (@PathVariable Optional<String> name, Model model)

if(name.isPresent()) {
    model.addAttribute("name", name.get());
}
else {
    model.addAttribute("name", "dengklek");
}
return "greeting";
}
```

Akses localhost:8080/greeting/

Pertanyaan: Apa hasilnya?

Akses localhost:8080/greeting/chanek

Pertanyaan: Apa hasilnya?

LATIHAN

- 1. Buatlah satu halaman baru untuk melakukan operasi perkalian.
- 2. Halaman ini menerima 2 buah parameter dari query string yaitu a dan b.
- 3. Pada view tampilkan hasil perkalian a dan b.
- 4. Jika a atau b tidak ada, nilai defaultnya 0.
- 5. Contoh hasil tampilannya

Jawaban:

```
C:\Users\Nabilah Zhafira \\eclipse-... \( \text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{\text{
```

Perkalian

$$0 \times 0 = 0$$

LESSON LEARNED

Pada tutorial kali ini, saya mempelajari banyak hal mengenai MVC terutama controller dan view pada Springboot, seperti bagaimana view, model, dan controller berinteraksi satu sama lain dalam MVC. Selain itu, saya juga mempelajari bagaimana cara melakukan passing variable dengan metode request dan path.
